Editorial Review

Review

"Regardless of our places in world today, those thousands of miles away affect our lives. This is especially true after the events of 9/11 and manifests itself again today in the recent economy downturn. Coming of Age in a Globalized World: The Next Generation serves as a primer for advisors seeking to better understand what globalization is and what it means for us and our students. The authors break down the concept of globalization into clear and manageable concepts using familiar terminology that will aid us in explaining the ramifications of not preparing our students to think globally."

"This thoughtful and lively book offers documentation and analysis to help us understand the proliferation of changes and connections throughout the world. Adams and Carfagna masterfully make clear the imperative of overcoming ignorance of the cultures, histories and languages of other societies. Globalization, they assert, means education!"
