Editorial Review

From Library Journal

Brohamer used the Sartin methodology of pace handicapping to develop his own technique for handicapping horse races. His system considers running styles, turn times, track variants, energy distribution, and par times in predicting race strategy and outcome. Daily Racing Form charts (not seen) illustrate the book. Brohamer relies on a hand-held calculator to compound ratings and generate energy percentages, something that may scare away weekend handicappers unwilling to devote hours to mathematical figuring and Form chartkeeping. Recommended for serious handicappers and libraries with strong racing collections.
