

Code Your Own Neural Network: A step-by-step explanation

By Steven C. Shaffer

Code Your Own Neural Network: A step-by-step explanation By Steven C. Shaffer

This mini-book will take you step-by-step through coding your own neural network. The language used is C++, although it's really mostly C syntax. Once you have mastered the steps, it should be easy enough to translate your knowledge into most other languages.

The book goes step by step through the development of a relatively simple 3-layer back-propagation neural network to solve the exclusive OR problem. The purpose is to explain the concepts from a code-literate standpoint. There are lots of text-heavy and math-heavy explanations of how neural networks work, but few code-centric explanations. The exclusive OR problem is a good example because this cannot be solved with a single-layer neural network. If you are a coder, the explanations should make sense to you. No explanations of C++ syntax are given, so this is not for the novice programmer. This book is not for the purist or the researcher, it's an introductory book for people who want a basic understanding of how neural networks work.

Editorial Review

Users Review

From reader reviews:

Paulette Rodriguez:

Within other case, little men and women like to read book Code Your Own Neural Network: A step-by-step explanation. You can choose the best book if you appreciate reading a book. Providing we know about how is important a new book Code Your Own Neural Network: A step-by-step explanation. You can add know-how and of course you can around the world by the book. Absolutely right, mainly because from book you can understand everything! From your country until finally foreign or abroad you will be known. About simple thing until wonderful thing you may know that. In this era, we are able to open a book or even searching by internet device. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's examine.

Dorothy Bernstein:

Spent a free time to be fun activity to complete! A lot of people spent their down time with their family, or their own friends. Usually they carrying out activity like watching television, about to beach, or picnic in the park. They actually doing same every week. Do you feel it? Will you something different to fill your own free time/ holiday? Can be reading a book can be option to fill your no cost time/ holiday. The first thing that you ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the publication untitled Code Your Own Neural Network: A step-by-step explanation can be very good book to read. May be it could be best activity to you.

Sharon Hite:

People live in this new moment of lifestyle always attempt to and must have the free time or they will get large amount of stress from both day to day life and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not really a huge robot. Then we ask again, what kind of activity do you have when the spare time coming to an individual of course your answer will probably unlimited right. Then do you ever try this one, reading guides. It can be your alternative in spending your spare time, typically the book you have read is actually Code Your Own Neural Network: A step-by-step explanation.

Natalie Althoff:

Many people spending their time period by playing outside along with friends, fun activity with family or just watching TV all day long. You can have new activity to enjoy your whole day by examining a book.

Ugh, do you consider reading a book really can hard because you have to take the book everywhere? It alright you can have the e-book, having everywhere you want in your Touch screen phone. Like Code Your Own Neural Network: A step-by-step explanation which is having the e-book version. So , try out this book? Let's see.
