Hello, Startup: A Programmer's Guide to Building Products, Technologies, and Teams

By Yevgeniy Brikman

Hello, Startup: A Programmer's Guide to Building Products, Technologies, and Teams By Yevgeniy Brikman

This book is the "Hello, World" tutorial for building products, technologies, and teams in a startup environment. It's based on the experiences of the author, Yevgeniy (Jim) Brikman, as well as interviews with programmers from some of the most successful startups of the last decade, including Google, Facebook, LinkedIn, Twitter, GitHub, Stripe, Instagram, AdMob, Pinterest, and many others.

Hello, Startup is a practical, how-to guide that consists of three parts: Products, Technologies, and Teams. Although at its core, this is a book for programmers, by programmers, only Part II (Technologies) is significantly technical, while the rest should be accessible to technical and non-technical audiences alike.

If you're at all interested in startups—whether you're a programmer at the beginning of your career, a seasoned developer bored with large company politics, or a manager looking to motivate your engineers—this book is for you.

Editorial Review

Review

"I wish I'd had a book like this when I was getting my start in the industry." - *Jay Kreps, CEO, Confluent Inc*

"Jim will give you a guided and well-informed look at what it takes to build a software startup. There is no jargon or fluff--just practical, simple, and proven advice, presented in an easily readable book." - *Eugene Mirkin, Entrepreneur in Residence, Array Ventures*

From the Author

I wish I had a book like *Hello, Startup* back when I was in college. By the time I graduated, I had a BS, a Masters, a bunch of internship experiences--and absolutely no idea what I was doing. What technologies should I learn and use? How do I build a user interface that doesn't look terrible? How do I negotiate a job offer? Should I negotiate for more salary or more equity? What is equity, anyway? Should I work at a large company or join a startup?

I learned the answers to these questions, and many others, the hard way--through trial and error. I also learned that thousands of other developers before me went through the same inefficient trial and error process. It doesn't have to be this way. While there are a small number of lessons that you can only learn by making your own mistakes, my hope is that you can learn everything else by studying the successes, failures, and stories in *Hello, Startup*.

About the Author

Yevgeniy (Jim) Brikman loves programming, writing, speaking, traveling, and lifting heavy things. He does not love talking about himself in the 3rd person. He is the co-founder of Gruntwork, a company that helps startups get up and running on AWS with DevOps best practices and world-class infrastructure. He's also the author of "Hello, Startup: A Programmer's Guide to Building Products, Technologies, and Teams," a book published by O'Reilly Media that has a 4.9/5.0 rating on Amazon and 4.5/5.0 rating on GoodReads. Previously, he worked as a software engineer at LinkedIn, TripAdvisor, Cisco Systems, and Thomson Financial and got his BS and Masters at Cornell University. For more info, check out ybrikman.com.

Users Review

From reader reviews:

Bertram Staten:

Book is definitely written, printed, or outlined for everything. You can learn everything you want by a book. Book has a different type. As we know that book is important point to bring us around the world. Next to that you can your reading skill was fluently. A guide Hello, Startup: A Programmer's Guide to Building Products, Technologies, and Teams will make you to be smarter. You can feel a lot more confidence if you can know about anything. But some of you think that open or reading a book make you bored. It is far from make you

fun. Why they are often thought like that? Have you seeking best book or ideal book with you?

Jennifer Wilson:

Your reading sixth sense will not betray an individual, why because this Hello, Startup: A Programmer's Guide to Building Products, Technologies, and Teams guide written by well-known writer who really knows well how to make book that may be understand by anyone who also read the book. Written in good manner for you, still dripping wet every ideas and publishing skill only for eliminate your current hunger then you still question Hello, Startup: A Programmer's Guide to Building Products, Technologies, and Teams as good book not only by the cover but also by content. This is one reserve that can break don't evaluate book by its include, so do you still needing another sixth sense to pick this!? Oh come on your studying sixth sense already told you so why you have to listening to yet another sixth sense.

David Hosford:

This Hello, Startup: A Programmer's Guide to Building Products, Technologies, and Teams is great reserve for you because the content and that is full of information for you who have always deal with world and get to make decision every minute. This book reveal it information accurately using great arrange word or we can claim no rambling sentences inside it. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but difficult core information with lovely delivering sentences. Having Hello, Startup: A Programmer's Guide to Building Products, Technologies, and Teams in your hand like obtaining the world in your arm, facts in it is not ridiculous just one. We can say that no book that offer you world with ten or fifteen minute right but this e-book already do that. So , it is good reading book. Hello Mr. and Mrs. busy do you still doubt this?
