Instabilities and Nonequilibrium Structures IX (Nonlinear Phenomena and Complex Systems) From Springer

This volume contains a selection of lectures and seminars given at the Ninth International Workshop on Instabilities and Nonequilibrium Structures which took place in Viña del Mar, Chile, in December 2001.

This book consists of two parts, the first one has three lectures written by Professors H.R. Brand, M. Moreau and L.S. Tuckerman. H.R. Brand gives an overview about reorientation and undulation instabilities in liquid crystals, M. Moreau presents recent results on biased tracer diffusion in lattice gases, finally, L.S. Tuckerman summarizes some numerical methods used in bifurcation problems.

The second part consists of a collection of selected seminars which cover different topics in nonlinear physics, from an experimental, numerical and theoretical point of view.

This book should appeal to mathematicians, physicists and engineers interested in dynamical systems, statistical mechanics, and nonequilibrium systems.

Editorial Review

Users Review

From reader reviews:

Ardith Bobo:

In other case, little individuals like to read book Instabilities and Nonequilibrium Structures IX (Nonlinear Phenomena and Complex Systems). You can choose the best book if you love reading a book. Given that we know about how is important some sort of book Instabilities and Nonequilibrium Structures IX (Nonlinear Phenomena and Complex Systems). You can add understanding and of course you can around the world by a book. Absolutely right, simply because from book you can learn everything! From your country right up until foreign or abroad you will end up known. About simple point until wonderful thing you could know that. In this era, we can open a book or maybe searching by internet device. It is called e-book. You can use it when you feel weary to go to the library. Let's examine.

Helen Rios:

The reserve with title Instabilities and Nonequilibrium Structures IX (Nonlinear Phenomena and Complex Systems) contains a lot of information that you can find out it. You can get a lot of help after read this book. This kind of book exist new information the information that exist in this book represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. That book will bring you in new era of the internationalization. You can read the e-book in your smart phone, so you can read the item anywhere you want.

Willie Navarro:

Often the book Instabilities and Nonequilibrium Structures IX (Nonlinear Phenomena and Complex Systems) has a lot of knowledge on it. So when you make sure to read this book you can get a lot of profit. The book was compiled by the very famous author. The writer makes some research ahead of write this book. This book very easy to read you can get the point easily after reading this book.

Jason Valladares:

Reading a book to become new life style in this calendar year; every people loves to learn a book. When you learn a book you can get a great deal of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. In order to get information about your review, you can read education books, but if you want to entertain yourself you are able to a fiction books, these us novel, comics, and also soon. The Instabilities and Nonequilibrium Structures IX (Nonlinear Phenomena and Complex Systems) provide you

with new experience in examining a book.
