# Boost.Asio C++ Network Programming Cookbook

By Dmytro Radchuk

Boost.Asio C++ Network Programming Cookbook By Dmytro Radchuk

Key Features

- Build highly efficient distributed applications with ease
- Enhance your cross-platform network programming skills with one of the most reputable C++ libraries
- Find solutions to real-world problems related to network programming with ready-to-use recipes using this detailed and practical handbook

Book Description

Starting with recipes demonstrating the execution of basic Boost.Asio operations, the book goes on to provide ready-to-use implementations of client and server applications from simple synchronous ones to powerful multithreaded scalable solutions. Finally, you are presented with advanced topics such as implementing a chat application, implementing an HTTP client, and adding SSL support. All the samples presented in the book are ready to be used in real projects just out of the box.

As well as excellent practical examples, the book also includes extended supportive theoretical material on distributed application design and construction.

What you will learn

- Boost your working knowledge of one of the most reputable C++ networking libraries—Boost.Asio
- Familiarize yourself with the basics of TCP and UDP protocols
- Create scalable and highly-efficient client and server applications
- Understand the theory behind development of distributed applications
- Increase the security of your distributed applications by adding SSL support
- Implement a HTTP client easily
- Use iostreams, scatter-gather buffers, and timers

About the Author

Dmytro Radchuk is a software engineer from Kyiv, Ukraine. His passion for

science started at a young age and led him to receive a degree in computer science from Kyiv Polytechnic University. As of today, he has deep technical knowledge and more than 8 years of experience in the field of software development for several industries and businesses. He strongly believes that the whole is greater than the sum of its parts and this is one of the reasons why the development of distributed applications has become his main specialization.

Dmytro has always supported the idea of sharing knowledge and this has resulted in Boost.Asio C++ Network Programming Cookbook, which has become his first officially published book. He believes that science will help us deal with the monotony of everyday life. When he is not exploring another facet of computer engineering, he is probably learning a new aspect of psychology, history, or the arts, which are also of great interest to him.

Table of Contents

1. The Basics
2. I/O Operations
3. Implementing Client Applications
4. Implementing Server Applications
5. HTTP and SSL/TLS
6. Other Topics

Editorial Review

Users Review

From reader reviews:

Lawrence Weatherby:

Information is provisions for people to get better life, information currently can get by anyone in everywhere. The information can be a understanding or any news even a problem. What people must be consider while those information which is inside former life are hard to be find than now is taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you get the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take Boost.Asio C++ Network Programming Cookbook as the daily resource information.

Thomas Palmer:

Why? Because this Boost.Asio C++ Network Programming Cookbook is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will surprise you with the secret that inside. Reading this book close to it was fantastic author who have write the book in such amazing way makes the content within easier to understand, entertaining method but still convey the meaning entirely. So , it is good for you for not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of rewards than the other book possess such as help improving your ability and your critical thinking means. So , still want to delay having that book? If I had been you I will go to the book store hurriedly.

Ann Fortune:

As we know that book is vital thing to add our expertise for everything. By a e-book we can know everything we really wish for. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year seemed to be exactly added. This reserve Boost.Asio C++ Network Programming Cookbook was filled regarding science. Spend your time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading the book. If you know how big advantage of a book, you can feel enjoy to read a reserve. In the modern era like today, many ways to get book you wanted.

Monica Bonner:

A lot of guide has printed but it is unique. You can get it by world wide web on social media. You can choose the most effective book for you, science, amusing, novel, or whatever through searching from it. It is called of book Boost.Asio C++ Network Programming Cookbook. You'll be able to your knowledge by it. Without causing the printed book, it may add your knowledge and make you actually happier to read. It is

most critical that, you must aware about reserve. It can bring you from one spot to other place.
