Ethnic Conflict and Protest in Tibet and Xinjiang: Unrest in China's West (Studies of the Weatherhead East Asian Institute, Columbia University)

From Columbia University Press

Despite a decade of rapid economic development, rising living standards, and large-scale improvements in infrastructure and services, China's western borderlands have experienced a wave of ethnic unrest not seen since the 1950s. Through on-the-ground interviews and first-hand observations, the international experts in this volume create an invaluable record of the conflicts and protests as they have unfolded—the most extensive chronicle of events to date. The authors examine the factors driving the unrest in Tibet and Xinjiang and the political strategies used to suppress them. They also explain why certain areas have seen a higher concentration of ethnic-based violence than others. For anyone struggling to understand the origins of unrest in contemporary Tibet and Xinjiang, this anthology is essential reading.

Editorial Review

Review

Ethnic unrest in Tibet and among the Uyghurs in Xinjiang is very much in the news and is a subject of great academic and public interest. It is hard to research because the Chinese government limits access to these areas. Nonetheless, these resourceful and courageous scholars have managed to access these regions, find out what is troubling the ethnic minority residents there, and assess how deep the trouble is.

(Andrew J. Nathan, coauthor of *China's Search for Security*)

Ethnic Conflict and Protest in Tibet and Xinjiang is a terrific book. Ten experts take a balanced and clear-eyed view of the conditions and politics behind the recent wave of ethnic unrest in China. It should be required reading for those who would understand the interlocking causes of conflict, including decision makers in Beijing.

(June Teufel Dreyer, author of *China's Political System*)

These studies of contemporary China's relations with the Tibetans and the Uyghurs offer insights on a wide variety of issues, including the Chinese state's policies toward Buddhism and Islam, the causes of conflicts between China and these so-called minority nationalities, the government's economic policies and the ensuing environmental effects, and the possible economic synergies between Chinese and Tibetan and Uyghur entrepreneurs. The authors differ in their opinions about the future, with some providing negative predictions while others are more optimistic, but each furnishes informed analyses.

(Morris Rossabi, author of *The Mongols* and *The Mongols and Global History*)

These essays provide detailed study of ethnopolitics in contemporary China based on solid fieldwork and scholarly analysis of regional peculiarities and standardizing policies.

(Tsering Shakya, coauthor of *The Struggle for Tibet*)

Highly recommended.

(*Choice*)

The body of research produced is undoubtedly of a very high standard, and makes a valuable contribution to the study of the ongoing conflicts in Xinjiang and Tibet.
