New Foundations in Mathematics: The Geometric Concept of Number By Garret Sobczyk

The first book of its kind, *New Foundations in Mathematics: The Geometric Concept of Number* uses geometric algebra to present an innovative approach to elementary and advanced mathematics. Geometric algebra offers a simple and robust means of expressing a wide range of ideas in mathematics, physics, and engineering. In particular, geometric algebra extends the real number system to include the concept of direction, which underpins much of modern mathematics and physics. Much of the material presented has been developed from undergraduate courses taught by the author over the years in linear algebra, theory of numbers, advanced calculus and vector calculus, numerical analysis, modern abstract algebra, and differential geometry. The principal aim of this book is to present these ideas in a freshly coherent and accessible manner.

New Foundations in Mathematics will be of interest to undergraduate and graduate students of mathematics and physics who are looking for a unified treatment of many important geometric ideas arising in these subjects at all levels. The material can also serve as a supplemental textbook in some or all of the areas mentioned above and as a reference book for professionals who apply mathematics to engineering and computational areas of mathematics and physics.

Editorial Review

Users Review

From reader reviews:

Anthony McDonell:

Book is to be different for every grade. Book for children until eventually adult are different content. We all know that that book is very important for people. The book New Foundations in Mathematics: The Geometric Concept of Number has been making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The publication New Foundations in Mathematics: The Geometric Concept of Number is not only giving you a lot more new information but also being your friend when you truly feel bored. You can spend your spend time to read your reserve. Try to make relationship with all the book New Foundations in Mathematics: The Geometric Concept of Number. You never truly feel lose out for everything if you read some books.

Susan Bannister:

Playing with family in the park, coming to see the coastal world or hanging out with close friends is thing that usually you have done when you have spare time, then why you don't try point that really opposite from that. 1 activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love New Foundations in Mathematics: The Geometric Concept of Number, you are able to enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh seriously its mind hangout people. What? Still don't understand it, oh come on its called reading friends.

Paul Herbert:

Reading a book being new life style in this year; every people loves to go through a book. When you learn a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you would like get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these us novel, comics, as well as soon. The New Foundations in Mathematics: The Geometric Concept of Number offer you a new experience in examining a book.

Lola Behrendt:

As we know that book is vital thing to add our understanding for everything. By a book we can know everything you want. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year

seemed to be exactly added. This reserve New Foundations in Mathematics: The Geometric Concept of Number was filled in relation to science. Spend your spare time to add your knowledge about your research competence. Some people has different feel when they reading a new book. If you know how big benefit of a book, you can experience enjoy to read a publication. In the modern era like today, many ways to get book which you wanted.
