## Hiroshima Nagasaki: The Real Story of the Atomic Bombings and Their Aftermath By Paul Ham

In this harrowing history of the Hiroshima and Nagasaki bombings, Paul Ham argues against the use of nuclear weapons, drawing on extensive research and hundreds of interviews to prove that the bombings had little impact on the eventual outcome of the Pacific War. More than 100,000 people were killed instantly by the atomic bombs, mostly women, children, and the elderly. Many hundreds of thousands more succumbed to their horrific injuries later, or slowly perished of radiation-related sickness.

Yet American leaders claimed the bombs were "our least abhorrent choice"?and still today most people believe they ended the Pacific War and saved millions of American and Japanese lives. In this gripping narrative, Ham demonstrates convincingly that misunderstandings and nationalist fury on both sides led to the use of the bombs. Ham also gives powerful witness to its destruction through the eyes of eighty survivors, from twelve-year-olds forced to work in war factories to wives and children who faced the holocaust alone.

*Hiroshima Nagasaki* presents the grisly unadorned truth about the bombings, blurred for so long by postwar propaganda, and transforms our understanding of one of the defining events of the twentieth century.

### Editorial Review

From [Booklist](#)

**\*Starred Review\*** In 1945, in the midst of secrecy about the development of the atomic bomb and ongoing debates over the most “efficient” way to end the war with Japan, American leaders made the fateful decision to launch nuclear attacks on Hiroshima and Nagasaki. The bombings certainly stopped the war and destroyed its targeted cities, killing more than 100,000 people, but had they been necessary? Ham presents a forceful argument that the bombing was excessive and unjustified. Alternate chapters recount the building tension toward the awful decision by the Allies and the day-to-day lives of starving Japanese caught between their aggressive emperor and military and sure retaliation. In this sweeping and comprehensive history, Ham details the geopolitical considerations and huge egos behind evolving theories of warfare, the burgeoning killing technology of biological and nuclear war on the part of the Japanese and the Allies as well as the shameful tactic of dehumanizing the Japanese enemy. But most powerful are the eyewitness accounts of 80 survivors, ordinary people caught up in the events of war, who felt the terrible destruction of a nuclear blast and its aftermath of radiation sickness. --Vanessa Bush

“Moral anger drives Mr. Ham... He shows us in agonizing detail that many were maimed or killed...
