**Principles and Practice of Pharmacology for Anaesthetists** By Norman Calvey, Norton Williams

This fifth edition of *Principles and Practice of Pharmacology for Anaesthetists* continues to provide a comprehensive scientific basis and a readable account of the principles of pharmacology, as well as practical guidance in the use of drugs that is relevant to clinical anaesthesia.

With these concepts in mind:

- Every chapter in this new edition has been thoroughly revised and updated
- An additional chapter on Adverse Drug Reactions is included
- For ease of reference, the structures of many commonly used agents are featured, with their sites of isomerism, when appropriate
- Recommended International Non-proprietary Names (rINNs) are generally used for generic agents, although preference has been given to the current nomenclature for adrenaline and noradrenaline

As in previous editions, a comprehensive glossary covering abbreviations and acronyms is included to aid the reader.

*Principles and Practice of Pharmacology for Anaesthetists* is an invaluable resource, both for candidates of professional examinations in anaesthesia and the practising anaesthetist wishing to refresh their pharmacological knowledge.
