Systemic Thinking: Building Maps for Worlds of Systems By John Boardman, Brian Saurer

"Systemic thinking" is the process of understanding how systems influence one another within a world of systems and has been defined as an approach to problem solving by viewing "problems" as parts of an overall system, rather than reacting to a specific part, outcome, or event.

This book provides a complete overview of systemic thinking, exploring a framework and graphical technique for understanding and identifying new ways to more efficiently solve problems and create solutions. Demystifying the conjunction of systems concepts and systemic diagramming techniques, this comprehensive pocket guide introduces and explains the basis of systemigrams, how to create a systemigram and a SystemiShow, illuminates multiple complex problems, and provides an overview of what purpose they serve for today's industry professionals.

Systemic Thinking: Building Maps for Worlds of Systems:

- Includes illustrative systemigrams and case studies
- Includes the SystemiTool software, developed by the authors
- Provides an overview of systemic thinking, particularly with regard to systemigrams
- Incorporates graphical representations of systemigrams
- Instructs how and when to implement a systemigram when a problem arises

An invaluable book for industry professionals—specifically, technical leaders in industry and business trying to confront complex problems—*Systemic Thinking* is also ideal for postgraduate students in engineering and business management.

About the Author

JOHN BOARDMAN is Principal of John Boardman Associates, a consultancy and training provider specializing in applied systemic thinking. He was formerly Distinguished Service Professor at Stevens Institute of Technology, where he is now Adjunct Professor in the School of Systems and Enterprises.

BRIAN SAUSER is an Associate Professor of Complex Logistics Systems at the University of North Texas. He previously managed an applied research and development laboratory in life sciences and engineering at the NASA Johnson Space Center and was the Program Director of the New Jersey NASA Specialized Center of Research and Training before joining Stevens Institute of Technology. He was also a Project Specialist with ASRC Aerospace.

Users Review

From reader reviews:

George Green:

As people who live in the particular modest era should be update about what going on or information even

knowledge to make these people keep up with the era that is certainly always change and move ahead. Some of you maybe will update themselves by studying books. It is a good choice for you personally but the problems coming to a person is you don't know which you should start with. This Systemic Thinking: Building Maps for Worlds of Systems is our recommendation to help you keep up with the world. Why, because this book serves what you want and want in this era.

Reginald McDade:

Nowadays reading books be a little more than want or need but also work as a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The details you get based on what kind of book you read, if you want send more knowledge just go with knowledge books but if you want experience happy read one along with theme for entertaining for instance comic or novel. Often the Systemic Thinking: Building Maps for Worlds of Systems is kind of guide which is giving the reader unstable experience.

Robin Harvey:

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their friends. Usually they performing activity like watching television, likely to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Might be reading a book could be option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to try out look for book, may be the book untitled Systemic Thinking: Building Maps for Worlds of Systems can be very good book to read. May be it may be best activity to you.

Christopher Pipkin:

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book was rare? Why so many issue for the book? But almost any people feel that they enjoy to get reading. Some people likes examining, not only science book but additionally novel and Systemic Thinking: Building Maps for Worlds of Systems as well as others sources were given expertise for you. After you know how the truly great a book, you feel need to read more and more. Science reserve was created for teacher or students especially. Those textbooks are helping them to bring their knowledge. In other case, beside science e-book, any other book likes Systemic Thinking: Building Maps for Worlds of Systems to make your spare time much more colorful. Many types of book like here.
